THE SKY IS FALLING

Instructions for use

SETTING UP

Read all instructions carefully — check you have followed the correct procedure for setting up the VIC and inserting this cartridge.

Once you have plugged in this cartridge and turned on the VIC you may find the picture is offset to the top left of your TV screen.

To centre the picture use both the cursor control keys. Pressing these keys or holding them down will centralise the picture on your television.

The volume control on your television set may also need adjusting as the game contains sound effects.

Also ensure that the paddles are connected.

OBJECTIVE

The sky is falling; large and small boulders are no longer fixed to the cave roof, they fall. With the bats displayed at the bottom, you can save the day, by catching the boulders as they fall.

HOW TO START THE GAME

To start the playing sequence press the **F1** function key. This will then let you choose either a one or two player game. The

F1 function key will select a one player game and **F3** will select a two player game.

Once in a game the program will prompt the player to press the 'Score Button' on the paddles to start the round.

PLAYING THE GAME

Once a game is in play the paddles will control the position of the bat in play. The paddles should be aligned before play begins. Only a very light hand is required on the paddles to make them move, so be careful.

HOW TO SCORE POINTS

Points are awarded for the size of the boulders that are caught as well as the 'round' at which the game is being played.
