

ActiBase™

The Quickest, Safest, Most Interactive Way To Publish Your Database On The Web.

Make Your Database Web Interactive. ActiBase Now!

Upload your database to the web quickly and easily without SQL programming nightmares! ActiBase™ automatically generates HTML code for all major ODBC databases with Locks & Keys Security options so your customers, employees and co-workers can interact at multiple access levels with your database quickly and easily! What good is a database if no one can get to the data? Feed the world. Activate your database now with ActiBase™

Check out these cool features:

- Support all ODBC databases
- Seamlessly generates SQL code to perform queries
- Dynamically generates HTML code to make information available on the web
- Billing support for transaction management
- Locks & Keys Security allows users to offer information publicly & privately from the same server
- Edit all code as necessary or desired
- Multi-threaded queries which perform searches faster than CGI or PERL on comparable hardware
- Drag & Drop form editor

UPLOAD WITHOUT THE CODE!

Open your database in ActiBase with just a few clicks.

Then, ActiBase publishes your database to the web.

So your customers and employees can interact instantly!

GALACTICOMM
The Leader in Online Solutions

Publish your database on the web quickly and easily.

ActiBase is a tool to publish, update and interact with any ODBC compliant database on the web or an intranet without any programming. Features include dynamically generated SQL and HTML code, a drag-and-drop form editor and flexible security features. Includes online documentation, technical support, and support for 8 simultaneous users, with user-count upgrades available.

WHO NEEDS ACTIBASE?™

Real Estate firms can offer up-to-the-minute listings online, including photos of each property. Users can even search by custom criteria.

Imagine giving your employees access to the crucial info they need in the field while securing it from prying eyes with ActiBase's Locks & Keys Security.

ActiBase is also perfect for inventory control, incident tracking, online shopping malls, community calendars, portfolio management and more!
