

# INOCULAN<sup>®</sup> ANTIVIRUS<sup>™</sup>

For Windows 95

## Your Leading Defense Against Computer Viruses.

## Inoculan AntiVirus 5.0 for Windows 95. The #1 Virus Protection Used By Corporations, Now Available For All Windows 95 Users.

For the best virus protection, companies worldwide depend on Inoculan, the #1 anti-virus solution for networks. This award-winning technology is now available for all Windows 95 users. Inoculan AntiVirus is industrial-strength virus protection from Computer Associates, the leader in corporate security. This means superior protection, faster detection of new viruses, and more technological advances to fit your needs.

### Inoculan AntiVirus for Windows 95.

- Superior real-time scanning and cure—certified by the National Computer Security Association (NCSA).
- Eliminates virus threats from Internet downloads, e-mail, floppy disks, shared files, and more.
- FREE automatic signature file updates.
- Fast, single-disk, disaster recovery.
- Total Internet protection.

**Safeguards You From All Virus Threats.** The best defense is a good offense. With Inoculan AntiVirus, you get superior realtime scanning and cure. It protects you against viruses from Internet downloads, floppies, shared files, hard disks, removable media, and other sources. Inoculan AntiVirus scans every file for viruses, even compressed and executable files, before they can enter your system. It even allows you to automatically cure any infections found.

### Inoculan AntiVirus Can Scan Compressed And Executable Files In The Following Formats:

- |        |                        |
|--------|------------------------|
| ✓ Zip  | ✓ ARJ                  |
| ✓ LHA  | ✓ UUencoded            |
| ✓ MIME | ✓ Microsoft Compressed |

**100% Protection—100% Cure.** Inoculan AntiVirus both detects and cures 100% of macro viruses “in the wild”\*. Scanning for viruses alone doesn’t protect your data without the ability to cure. Inoculan AntiVirus is certified by the National Computer Security Association (NCSA) to protect you against 100% of the viruses “in the wild”—the viruses actually in circulation. It offers the most complete protection against all virus types, including sophisticated macro, boot sector, stealth, and polymorphic varieties. Its heuristic scanning engine can even detect malicious unknown strains that have yet to be identified.

**Total Internet Virus Protection.** You can safely download files from the Internet without having to worry about virus threats. Inoculan AntiVirus provides complete Internet virus protection by alerting you to viruses found during Internet downloads, and eliminating them before they can cause any damage.

**Easy, Convenient And Automatic.** Inoculan AntiVirus is simple to install and use. Just install it and stop worrying—you have the latest, most powerful anti-virus product working for you. With Inoculan AntiVirus’ realtime monitor and cleaning wizard, you always have an expert at your side. Its flexible menu system allows you to customize scheduled scanning of files. You can even choose between automatic or manual cleaning options such as cure, quarantine, and delete.

**Fast, Single-Disk, Disaster Recovery.** Viruses, power surges, and other factors can damage critical files and areas of your hard drive, and render your computer unbootable. Our Rescue Disk Wizard allows you to automatically create a backup of critical system information to a floppy disk. In an event of an emergency, this diskette can be inserted into your computer to re-start and restore your system. It's that simple.

**FREE, Automatic Online Updates.** New viruses are discovered every day. To ensure protection against tomorrow's viruses, it is critical that you keep your signature files up-to-date. With Inoculan AntiVirus, you never have to worry about keeping your files current or keeping track of your last update. With our easy one-button access, new signature file updates are downloaded every 30 days to your system for FREE.

**Virus Information Center.** The Computer Associates Virus Information Center ([www.cai.com/virusinfo](http://www.cai.com/virusinfo)) offers the most comprehensive online resource for virus information. It includes up-to-date information and access to the Computer Associates Virus Clinic—the first and only online virus scanning service.
