

# Adobe™ Acrobat™ Lotus Notes Templates

## Read Me Notes for Version 2.0

This template demonstrates how to use Acrobat with Lotus Notes. The template is designed to be an example which demonstrates how to design a notes database so that it integrates smoothly with Adobe Acrobat.

### Installation

You must install the following software on your machine:

- Lotus Notes 3.0c or later
- Acrobat Exchange 2.0 or later for Windows

The following must be placed on your path (typically put in your windows directory) for the Acrobat Sales Reference template:

- keys.exe
- sendkeys.dll

The following must be placed on your path (typically put in your windows directory) for the Acrobat Document Review template:

- keys.exe
- sendkeys.dll
- acroauto.dll
- acrodemo.exe
- cntrldll.dll
- mfcoleui.dll

The lotus notes templates, doclib.ntf and docrevu.ntf, must be put in your Notes directory to be used as a sample notes template. Please see your Notes user guide for more information.

### Templates

See "Using Acrobat Sales Reference" or "About Acrobat Sales Reference" in the Notes help menu for more information about this template. These menu items appear within Notes when the Acrobat Sales Reference template or a database created from this template is selected.

See "Using Acrobat Document Review" or "About Acrobat Document Review" in the Notes help menu for more information about this template. These menu items appear within Notes when the Acrobat Document Review template or a database created from this template is selected.

See "Integrating with Lotus Notes" in the "Acrobat Exchange Online Guide" for more detailed information about how Acrobat integrates with Lotus Notes.
