

# CUBES

By Leo Christopherson

**INSTRUCTIONS** - This program will seek an arrangement for four cubes with sides having four different colors or numerals, such that when placed side by side, each consecutive top (or bottom or front or back) is of a different color or numeral.

Place your four cubes side by side in any order...during the program the initial front face of each cube will be called 1, the top 2, the back 3, the bottom 4, left side 5, and right side 6.

After you have entered the requested data, this program will begin rearrangement of the cubes, stopping to display the solution - if there is one.

In case you haven't noticed, this program gives the solution to "Instant Insanity", which is a game consisting of four plastic colored cubes. "Instant Insanity" is a product of Parker Brothers Div of General Mills Fun Group, and may be purchased in most novelty or toy stores.

## SOFTWARE available to you by 80-US
