User Instruction Manual

QUICK, WATSON!

"Quick, Watson!" is a game of elementary deduction which allows you the opportunity to match specific criminals to specific crimes. All of the crimes were committed during the great train robbery in England.

After more than a year of searching, Scotland Yard rounded up seven suspects for the four crimes committed. The four crimes are assault, felony theft, arson and illegal parking. The suspects (known criminals) are, Snidely, Brutus, Ivan, Nick, Tex, Dudley and Merle.

You have up to eight trials (after which time the statute of limitations runs out) to match the right criminal to the right crime. Remember, one criminal could have committed more than one of the crimes.

Notice that you have a lie detector to help you keep track of your suspects for each trial. But, it only tells you if you have pegged a suspect to the right crime or if you have named a guilty suspect to a wrong crime. It does not tell you which one(s) of your selections is correct.

To play the game, just place a suspect's initial below the crime. A typical game may appear as follows:

TYPICAL GAME

SUSPECTS: SNIDELY BRUTUS IVAN NICK TEX DUDLEY MERLE

Trial Number	Assault	Felony Theft	Arson	Illegal Parking	Lie Detector	
					Pegged	Wrong Crime
1	S	B	I	N		II
2	N	I	T	D		III
3	T	I	N	M	I	I
4	T	D	S	I	I	I
5	I	D	N	D		II
6	T	N	D	T	III	
7	T	N	S	T	II	
8	T	N	D	B	IIII	

If you didn't succeed on your first attempt, just type RUN and try again.

Load the program into the computer as described in the User's Manual for Level I. If your computer is equipped with Level II BASIC, load the program with a CLOAD "Q" command.

All Radio Shack computer programs are distributed on an "AS IS" basis without warranty.

Radio Shack shall have no liability or responsibility to customer or any other person or entity with respect to any liability, loss or damage caused or alleged to be caused directly or indirectly by computer equipment or programs sold by Radio Shack, including but not limited to any interruption of service, loss of business or anticipatory profits or consequential damages resulting from the use or operation of such computer or computer programs.

NOTE: Good data processing procedure dictates that the user test the program, run and test sample sets of data, and run the system in parallel with the system previously in use for a period of time adequate to insure that results of operation of the computer or program are satisfactory.

Refer to User's Manual for warranties. Failure to adhere to procedures set forth in User's Manual may result in the loss of warranties.
