TANDY 6000/MODELS 16/12/II		
SCRIPSIT 3.0 - With the SF-510 Dual-Bin Sheet Feeder		
Xenix 3.0 - Swap Space Reported in K Bytes	8	8
TANDY 2000/1200 HD/1000		
Tandy 1000 & 2000 Multiplan - CHR\$(27)		
Tandy 1000 Microsoft Word - With the DMP-105		8

RSCC/PLUSCC UPDATE 1985-19 ** Internal Distribution Only ** 10 June 1985 Page 2

As Indicated by the name, "Grapevine", this section is where Customer Service Representatives share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month, or send your information to CompuServe ID number 70007,535. Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an "as is" basis for the use of store personnel only. Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

MODEL 4P (26-1080) - WITH A 15 MEG HARD DISK

When using a 15 Meg Hard Disk with the Model 4P, customers will get a "Disk Error" if they attempt to bootup or reset the system with the hard disk turned on. Despite what is described in the installation manual, the correct procedure is to turn on the computer and bootup the start-up diskette <u>prior</u> to turning on the hard disk. Once the TRSDOS screen appears (with an "H" in the upper right corner) the screen will freeze until you power-up the hard drive. Upon power-up, "TRSDOS READY" will appear and the 15 Meg is ready to go. This procedure must be repeated every time the computer is reset. This only applies to the Model 4P, not the Model 4.

EDITOR'S NOTE: A Publication Change will be submitted.

(MARK SAMWICK STORE #11-7103)

MODEL III HARD DISK SYSTEM - MIXING HARD DRIVES

Presently the HARDGEN/BAS program will not support adding a 15 Meg Secondary Hard Drive to an existing Model III system with a 5 Meg Primary Hard Drive. To correct this problem, use a backup of the Hard Disk Operating System Initialization disk, and add the following two lines to the HARDGEN/BAS program:

2245 DATA "5 + 15"
2247 DATA 4,6,6,6,153,306,306,306,01,1,2,2,2,4,1,2,3,4,2,2,2,1,1,3,5,
S,RES,RES,RES,RES,RES,S,S

After saving HARDGEN/BAS, make a backup of this disk and follow the instructions in the "Hard Disk System Start-up Manual". This will allow the use of a 15 Meg Secondary Hard Drive with a 5 Meg Primary Hard Drive.

EDITOR'S NOTE: This modification will be checked by Computer Customer Service. A CSB might be generated.

FORMATION (26-1527) - APPROXIMATE SYSTEM CAPACITIES

Maximum number of pages per form - 9.

Maximum calculations and nested calculations - no limit, except a maximum of 80 characters per calculation.

Maximum questions - depends on RAM size, possible 10,000 maximum.

Most complex calculations - no limit, except a maximum of 80 characters per calculation.

MODEL 4 COBOL ACCOUNTING PACKAGES - ON THE MODEL 4P

If a Model 4 COBOL accounting program will not boot on the 4P, try the following procedure:

- 1. Place TRSDOS 06.01.01 (or greater) system disk in floppy drive 0.
- 2. Place the Application Program disk in floppy drive 1.
- Type:

BACKUP \$/SYS:0 :1 (SYS, INV, OLD)

The Application Program will now boot on the Model 4P.

(C. IMLER, 01-7879)

MODEL III DISK SCRIPSIT (26-1563) - ORDERING EXTRA KEYBOARD DECALS

To get extra keyboard decals for Model III Disk SCRIPSIT, order National Parts #AHC0062. Extra decals are not available for Model 4 Disk Scripsit (26-1596), however, the decals are similar enough that ordering those for the Model III might still be beneficial.

PROFILE 4 PLUS (26-1635) - SCREEN INDICATOR FORMAT

According to page 33 of the manual, the screen indicator "&" will print the date in the YY/MM/DD format. This is incorrect. The screen indicator "@" will print in the YY/MM/DD format. The "&" screen indicator will print the date in the MM/DD/YY format.

Page 49 of the Instant Profile Guide has the correct formats for the screen indicators.

(R. MOORE, 01-7879)

SCRIPSIT 3.0 (26-4835) - WITH THE SF-510 DUAL-BIN SHEET FEEDER (26-1477)

If SCRIPSIT 3.0 displays the message 'sheet feeder out of paper' when using the DWP-510 (26-1270) and the SF-510 Dual-Bin Sheet Feeder, check the sheet feeder for paper and proper alignment, then check the printer itself. The printer may be out of ribbon, off-line, etc. and still cause this error message.

The best way to check the printer is by removing the sheet feeder from the printer and trying to print the document normally. The regular printer error messages will then occur if there are still problems.

(R. RIFE & T. McCARTY, 01-7879)

<u>XENIX 3.0 (700-3030) - SWAP SPACE REPORTED IN K BYTES</u>

Don't be confused when initializing your hard disk under 3.0. The system will prompt you to change the swap space. You will enter the number of blocks that you want. When the system boots up, the swap space is reported in K bytes. Therefore, if you entered 4096 blocks, the system will tell you 2048. There are two blocks per K, therefore you have exactly what you wanted; 4096 blocks.

(R. BURROUGHS, 01-7879)

TANDY 1000 & 2000 MULTIPLAN (25-1152 & 26-5311) - CHR\$(27)

There is a misprint in the "Printing Multiplan Files" section of the Multiplan Manual. The manual shows that a "^{" is to be used for the CHR\$(27) code. A "^[" should be used instead.

EDITOR'S NOTE: A Publication Change will be submitted.

(ROBERT VAN HERSETT, STORE #11-7334)

TANDY 1000 MICROSOFT WORD (25-1153) - WITH THE DMP-105 (26-1276)

Microsoft Word on the Tandy 1000 using the DMP-105 works better with the DWII printer driver than with the DMP110 printer driver. The control codes used by the DMP-105 are more similar to those of the DWII than the DMP-110.

(M. SHORE, 01-7879)

700-SERIES INFORMATION

The following is a list of current and future 700 numbers for Computer Software corrections, addendums, revisions and enhancements for the Color Computers, Models I/III/4/4P, 100, Models II/12/16, Tandy 1000, and Tandy 2000.

EDITOR'S NOTE: These products are listed by 26-series number.
