TANDY...
Clearly Superior™

PRODUCT NEWS

The following information is provided by Technical Support,
Computer Customer Service, and Computer Merchandising.

CUSTOM FORMS PROGRAM - ADDRESS CHANGE

Your custom forms orders will be processed more quickly if they are sent directly to
the new offices of Image Tek (formerly Trinity Forms):

    Image Tek Corp.
    1431 Greenway Drive, Suite 200
    Irving, TX. 75038

The toll free numbers remain unchanged:

    National (800) 527-0625
    Texas   (800) 492-5232

The correct procedure in the case of misprinted forms is as follows:

    1. Call the toll free number (above) and obtain a Returned Goods
        Authorization Number.

    2. If Image Tek requests that the goods be returned, ship them to:

    Image Tek Corp.
    #1 Forms Drive
    Carrollton, TX 75006

        DO NOT SEND TO TEW!

    3. Image Tek will credit TEW for the misprinted goods, and TEW will credit
        your store.

DWP-210 (26-1257) - ORDERING ADDITIONAL PRINTWHEELS

The following vendor has indicated to us the availability of additional printwheels
to fit the DWP-210. Your customers should call them to confirm availability and
ordering information.

    Computer Supplies Unlimited
    2292 Lincoln Ave.
    San Jose, CA. 95125

    (800) 621-0854   ext. 268
    (408) 265-0200   (in California)

MODEL 100 MULTIPLAN (26-3829) AND INTERACTIVE SOLUTIONS (26-3844)

Multiplan for the Model 100 is a subset of the full Multiplan and contains all the mathematical functions of Multiplan. Interactive Solutions contains a data manager (exactly the same as Data Manager 26-3836), a spreadsheet (similar to Spectaculator 26-3828), and text formatter (similar to Scripsit 100 26-3830). Both are now available at TEW. Each software package sells for $149.95.*

Multiplan and Interactive Solutions are ROM based and plug into the optional ROM socket on the bottom of the unit. By using this type of software we are able to leave the internal RAM memory virtually untouched. What this really amounts to is that RAM memory is not used except for storage of data created by these programs.

These are perfect packages to sell to your Model 100 customers. They have been requesting this type of product for a long time and now we have what they have been asking for. There is absolutely no reason not to be able to sell these to existing and future Model 100 owners.

*Suggested Retail

MODEL III/4 ACCOUNTING MODULES (700-2299) - AVAILABILITY STATUS

700-2299 has been discontinued in the warehouse. The stock number will still remain reserved and when a 1.1 version is put together, it will be available as 700-2299 again. In the meantime, all copies for stores will have to be sent from Customer Service. Please do not call for copies if you can help it! Make backups from your store copy and use those for customer backups.

TANDY 1000 - IBM'S "NET WORTH" NOT PRESENTLY COMPATIBLE

IBM's Personal Financial Program "Net Worth" doesn't run on the Tandy 1000. The next version of BIOS (available sometime in August) will allow correct operation.

TANDY 1000 LOTUS 1-2-3 (25-1145) - NOT RECOMMENDED FOR USE ON 1200 HD

Computer Merchandising has heard that stores/customers are being told that the Tandy 1000 version of Lotus 1-2-3 (25-1145) works on the 1200 HD. The Buyer says it may appear to work okay, but it is not designed to; and, contractually we (Radio Shack) are prevented by Lotus from selling the 1000 version to run on the 1200 HD. Be sure you don't give stores or customers the impression that it is okay to recommend or use the 1000 version on the 1200 HD.

EXPRESS ORDER SOFTWARE

EXPRESS ORDER SOFTWARE PRODUCT AVAILABILITY

The following is a list of new and future EOS 90-series numbers for Computer Software. The date under STATUS is when you can expect TEW to ship a new order.

NOTE: These products are listed in alphabetical order by product title.

CSR GRAPEVINE

As indicated by the name, "Grapevine", this section is where Customer Service Representatives share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month, or send your information to CompuServe ID number 70007,535. Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an "as is" basis for the use of store personnel only. Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

CGP-220 (26-1268) - REMOVING INK CARTRIDGES

Any customer purchasing a CGP-220 and taking it on a plane as baggage should remove the ink cartridges first, otherwise they may explode inside the printer.

(SUSAN BOIS, STORE #11-7705

MODEL 4 TRSDOS 6.1.2 AND 6.2 - CLICK FILTER, TONE AND DURATION

There has been some confusion about the values to use with CLICK/FLT on Model 4 TRSDOS to change the tone and duration. The correct values are:

TRSDOS 6.1.2:   D00,7E=XX,YY;F00,7E=05,00

TRSDOS 6 2.   D00,A0=XX,YY;F00,A0=18,48

Where XX is the new tone duration and YY is the new tone pitch.

CORRECTION TO CUSTOMER SERVICE BULLETIN 1556-25 - MODEL I/III PAYROLL

Customer Service Bulletin 1556-25 has an error in it   After adding new Line 9190, a syntax error will occur. The corrected line requires an equal sign (=) after the second BP$ in Line 9190. A corrected CSB will be issued.

(L. POYTHRESS 01-7879)

Page Missing From Source Material

XENIX 3.0 OPERATING SYSTEM (700-3030) - CHANGING SWAP SPACE

Xenix 3.0 will prompt you during initialization to change the swap area. The default is 2057 blocks. When entering different values, give the block size

Upon bootup, Xenix will return the swap area in K bytes (2 blocks = 1K).

(R BURROUGHS, 01-7879)

TANDY 1000 MS-DOS (02.11.21) - GRAPHICS COMMAND

In MS-DOS 02.11.21 for the Tandy 1000, it is now possible to dump graphics to a DMP series printer by using the Graphics command. However, the Graphics command will not work if the lpdrvr.sys file has been installed in the config.sys file.

EDITOR'S NOTE: MS-DOS 02.11.21 will be shipped only with new hardware. There is no upgrade for existing customers. They will be notified when MS-DOS 02.11.22 (which will include the new BASIC) is available.

(8 CONN, 01-7879)

TANDY 1200 HD BASIC - TRAPPING THE <BREAK> KEY AND <CONTROL><C>

To Trap the <BREAK> key on the Tandy 1200 HD in BASIC, use this routine:

```
10 KEY 15, CHR$(&H08)+CHR$(70)
20 KEY (15) ON
30 ON KEY (15) GOSUB XXX
```

To Trap <CONTROL><C>, change line 10 to: 10 KEY 15, CHR$(&H04)+CHR$(46)

To disable both the <BREAK> key and <CONTROL><C> at once use the following routine:

```
10 KEY 15,CHR$(&H4)+CHR$(70)
20 KEY(15) ON
30 ON KEY(15) GOSUB 200

- user program -

200 PRINT "   BREAK!!!    "
210 RETURN
```

(M BARNER & S HINR, 01 7879)

MAI ACCOUNTS RECEIVABLE (26-5213) - PREPAYMENTS

The MAI Accounts Receivable system treats a prepayment as a negative open invoice. To enter the invoice that the prepayment applies to, use "Open Invoice Data Entry".

Enter the same invoice number that was used to enter the prepayment. The message "Is this an Invoice Adjustment" will appear, answer "Yes". Complete the invoice entry and print the open invoice data register. After running the update, the prepayment and the invoice will cancel each other.

(C INLER, 01-7879)

MULTIMATE (26-5330, 03.20.00) - AUTOSAVE FUNCTION

Adding more memory to your 2000 system will not increase speed of operation, nor will it allow more information (text) in memory at one time, thereby decreasing the amount of disk access. The "autosave" function which opens and closes the file between pages is built into the 03.20.00 program but will be an option in version 03 30.00.

(T FARMER/B. OLSON, 01-7879)

MS-DOS COMPUTERS - USING BASIC TO READ <ARROW> AND <FUNCTION> KEYS

The Arrow and Function keys in "Extended ASCII" send more than one byte. For example, on the Tandy 1200 HD the <UP-ARROW> key will send the string: CHR$(00);CHR$(72). These strings will not be read properly by INPUT$ or INPUT.

An INKEY$ loop will capture the entire string sent by these keys. The following program can be used to capture these strings:

```
10 KEY 1,"":KEY 2,"":KEY 3,"":KEY 4,"":KEY 5,"":KEY 6,""
20 KEY 7,"":KEY 8,"":KEY 9,"":KEY 10,"":KEY 11,"":KEY 12,""
30 CLS
40 PRINT"enter any key"
50 A$=INKEY$
60 IF A$="" THEN 50
70 IF LEN(A$)=1 THEN 150
80 PRINT"key hit was extended code"
90 B$=LEFT$(A$,1)
100 C$=RIGHT$(A$,1)
110 PRINT"1st char =";ASC(B$)
120 PRINT"2nd char =";ASC(C$)
130 PRINT
140 GOTO 40
150 PRINT"key hit was ascii code = ";ASC(A$)
160 PRINT
170 GOTO 40
```

Then use MID$ to break down the string.

(B CONN/M BRUMLIK, 01-7879)
