	DWP-210 Tractor Feed - Availability Status	

#### PRODUCT NEWS

The following information is provided by Technical Support, Computer Customer Service, and Computer Merchandising.

#### BPS-400 BACK-UP POWER SUPPLY (26-1189) - SENSITIVE TO MISWIRED WALL OUTLETS

Present versions of the BPS-400 cannot tolerate miswired electrical wall outlets; specifically, reversed polarity between the hot and neutral lines. A CROSSWIRED 3-LINE WALL OUTLET REPRESENTS A DANGEROUS SITUATION IN VIOLATION OF STANDARD BUILDING CODES WHICH THE CUSTOMER SHOULD HAVE CORRECTED IMMEDIATELY BY A COMPETENT ELECTRICIAN. Radio Shack's 3-Wire Outlet Analyzer (22-0101, \$5.95) can quickly and safely check this condition.

The Back-Up Power Supply may short out if used in a crosswired outlet, necessitating repair (A computer may work from this same outlet since its switching power supply can usually endure reversed polarity.) Back-Up units beginning from the serial number 1155756 have been modified to protect then from crosswired outlets. However, in the interest of safety, it is always wise to confirm proper site wiring with the #22-0101 Outlet Analyzer.

## DWP-210 TRACTOR FEED (26-1443) - AVAILABILITY STATUS

The latest shipment of tractor feeds for the DWP-210 (26-1257) arrived in mid-July. Quantities available will cover most of the back orders received in June. The next order is due by mid-September. Make sure your salesmakers are aware of this schedule. There should be no reason to call Fort Worth for information.

#### 24K MODEL 100 (26-3802) - NO LONGER AT SALE PRICE

We have received a number of calls from customers and stores asking if the 24K Model 100 is still on sale for \$499.00. The sale has ended and the Model 100 has returned to its regular price of \$599.00.\*

\*Suggested Retail

#### MODEL 4 (26-1069) - REPLACED BY MODEL 4D LATER THIS YEAR

Sometime during October the Model 4D will replace the Model 4. The 4D includes Deskmate, has double-sided drives and a <8ACKSPACE> key. All Model III and 4 software will run on this computer and any Model I software that is Model III compatible will also work. All current Model III and 4 peripherals will work with the 4D.

### LOTUS 1-2-3 (25-1145) - DO NOT SELL FOR USE WITH TANDY 1200 HD

DO NOT sell Lotus 1-2-3 for use with the Tandy 1200 HD.

- Tandy Corporation is prohibited by contract to sell Lotus 1-2-3 for use with the Tandy 1200 HD.
- Lotus 1-2-3 is not designed for use with the Tandy 1200 HD.
- 3. We have not tested Lotus 1-2-3 with the Tandy 1200 HD.
- 4. Tandy 1200 HD owners can purchase the IBM PC version of Lotus 1-2-3 for use with the Tandy 1200 HD.

#### MAI BASIC FOUR ACCOUNTING PROGRAMS - MOVED TO EOS

The following MAI Basic Four Accounting programs have been cancelled and will be carried in our Express Order Software program.

26-5211 Financial Statements

26-5215 Order Entry

26-5216 Sales Analysis

26-5217 Purchase Order

These products will be added to the Express Order Product Availability report in the near future.

As indicated by the name, "Grapevine", this section is where Customer Service Representatives share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month, or send your information to CompuServe ID number 70007,535. Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an 'as is" basis for the use of store personnel only. Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

#### CORRECTION UPDATE 1985-15: SCRIPSIT 16 (26-6431) - DMP-2100 SHEET FEEDER

We previously stated that you could print up to 56 lines per page when using SCRIPSIT 16 in conjunction with the DMP-2100 (26-1256) and the sheet feeder (26-1440). This is incorrect. The document can have no more than 54 printed lines per page. A procedure to follow would be to set the top and bottom margins to 0, then paginate the document for 54 lines per page. The result is a document with 54 lines per page (including headers and/or footers) with a top and bottom margin of one inch each. (This was tried with SCRIPSIT 16 version 01.01.00 and Xenix 01.03.05.)

(R. RICHARDS WOWIG. 01-7879)

#### MODEL III BUSINESS GRAPHICS ANALYSIS (26-1597) - DMP-430 PRINTER/DMP-400 DRIVER

Customer Service has tested this program using the DMP-400 driver with the DMP-430 Printer (26-1277). The line, scatter, bar, and pie charts all printed with no problem

(T. FARMER, 01-7879)

### MODEL 16 JOB COSTING (26-6209, 02.00.00) - CAPACITIES OF PROGRAM

The following information regarding capacities was provided by Software Engineering.

NOTE: These figures relate to version 02.00.00 and are approximations only.

Programs - 132,096 bytes

Transactions # of transactions \* 124 = number of bytes used

History # of transaction bytes used \* # of months saved = # of bytes used

There are no hard coded limits in Xenix Job Costing; you are limited only by available disk space.

T FARMER, 01-7879)

#### DESKMATE (25-1000) - WITH HAYES MODEM

The following definitions work with the Hayes Modem and Deskmate (versions 01.00.00 and 01.01.00) for the Tandy 1000. These versions were tested with MS-DOS version 02.11.21. The definitions should work with 02.11.22 as well. This is used with the new 1200 Baud PC Modem Board 25-1013.

#### DEFINE MODEM FOR VOICE DIALING:

DELAY: 2
SEND: ATDT
NUMBER
SEND: ^M
DELAY: 5
SEND: ^M

### DEFINE MODEM FOR COMPUTER DIALING:

DELAY:2
SEND: ATDT
NUMBER
SEND: ^M
WAITC

NOTE. On version 01.00.00 substitute PAUSE for DELAY in the modem definitions.

EDITOR'S NOTE: Remember 02.11.21 is shipping with new hardware only. It is not available as an upgrade.

(L. KILCREASE, 01-7879)

## LOTUS 1-2-3 (25-1145 & 26-5300) - TRANSFERRING VISICALC FILES

Some customers may find it reassuring to know that they can move up to the MS-DOS environment without having to re-enter all of their VisiCalc data into another MS-DOS application. For example, to transfer Model II Enhanced VisiCalc (26-4521) files, use Model II Videotex Plus (26-4721) or Model II TRSDOS TERMINAL program on the sending end, and Tandy 1000 Deskmate (25-1000) or Tandy 2000 Videotex Plus (26-5260) on the receiving end. The /vc files can be transmitted at 300 baud (at higher baud rates, data can be garbled or lost during disk I/O) by either using modems or hard-wiring the machines with a serial cable and a null modem. Once the files have been captured on the MS-DOS computer, they can be translated to Lotus 1-2-3 with the Translate utility on the appropriate version of Lotus 1-2-3.

This procedure can be used with VisiCalc (26-1520, 26-4511) and Enhanced VisiCalc (26-1569, 26-4521).

(GENE SCHENBERG, 01-0108)

## MICROSOFT WORD (26-1153 & 25-5314) - EDITING THE STYLE SHEET

A listing of usages that are part of the Style Sheets can be obtained by doing: Format, Style, Sheet, then selecting a sheet, then Gallery, Insert, tab, arrow key. This enables you to edit the Style Sheet, using pre-established formats.

(T. FARMER, 01-7879)

#### WORDSTAR PROFESSIONAL (25-3170) - WITH THE DWP-210 (26-1257)

A problem has been discovered when using Wordstar Professional with the DWP-210 printer. The printer drops characters. The same BUFFER.COM file that corrects this problem with Microsoft Word (26-5314, see Addendum page 1 of the Microsoft Word manual) will also work with Wordstar. If you don't have a copy of Microsoft Word, you should be able to obtain the BUFFER.COM file from your local Area Training and Support Operation.

(T. FARMER, 01-7879)

#### TANDY 2000 MICROSOFT WORD (26-5314) - AND THE DMP-400 (26-1251)

The left margin, when printed on the DMP-400, does not match the left margin which shows on the screen; it is too far to the right. This results from the way in which Microsoft Word handles conversion of the values used to specify print head movement. In the printer manual these values are expressed in points, yet Microsoft Word expects all values to be converted to a unit known as a twip - 1/1440 of an inch. Because the DMP-400 has an odd number of dots per line, this conversion routine contains a degree of error. This can not be fixed; however, if you move the tractor feed to the right, the problem can be minimized.

T FARMER & J VERDEN. 01-79791

#### TANDY 1000 & 2000 PFS:WRITE (25-1142 & 26-5309) - DOCUMENT SIZE

The maximum document size is approximately 32K. This is a hard coded limitation of the program and does not change with increased memory or increased disk space.

(T FARMER, 01-7879)
