PRODUCT NEWS

The following information is provided by Technical Support, Computer Customer Service, and Computer Merchandising.

<u>TANDY 200 (26-3860) - FUTURE SOFTWARE</u>

By October we expect to have available a text formatter, a data manager, a project scheduler, and a time minder (calendar) for the Tandy 200. Within 30 to 60 days after these four are released, we should also have 3 bar code programs (the same ones as for the 100), a ROM program called Multi-Solutions (which will include the same data manager and time minder that will be on cassette, and will also include a different text formatter than will be on cassette), and a chess game.

RADIO SHACK PRINTERS - SERIAL PORT COMPATABILITY

Radio Shack printers which have serial ports are designed to be Color Computer compatible and do not necessarily work as true serial ports. Therefore, printing serially to a Radio Shack printer from a computer other than the Color Computer is not supported. In other words, only parallel printing is supported with the configuration of the Tandy 2000, 1200 HD or 1000 and any of our Radio Shack printers.

THIRD PARTY **PRODUCTS - EXPRE**SS ORDER

ACE (90 · 0324) - PRICE CORRECTION

RSCC PLUSCC Update 1985-22 incorrectly lists the price of ACE, service station management program, as \$600.00.* The actual price is \$995.00. This error has caused some confusion among store personnel. The correct price has been noted in subsequent Updates.

RSCC/PLUSCC UPDATE 1985-32 ## Internal Distribution Only ## 3 September 1985 Page 3

As indicated by the name, "Grapevine", this section is where Customer Service Representatives share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month, or send your information to CompuServe ID number 70007,535. Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an "as is" basis for the use of store personnel only. Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

MODEL 100 BASIC PROGRAMS

The following programs were originally PC-2 programs which have been re-written to run on the Model 100. These BASIC programs should run on other Radio Shack computers with little or no adjustment. Stars and Stripes Forever would have to be adjusted because it requires sound. The other program, American Flag, requires the CGP-115 printer (26-1192).

```

PROFILE 16 (26-6412) - RENAMING FILES

Profile 16 puts a password on the files it creates -- separate from user-supplied passwords. This makes it impossible to rename a fully set-up system to use, for example with multiple companies. There is a way around this however.

To move Profile 16 files to another name, do the following:

- Login as root and enter the Profile program: m <ENTER>
- 2 Go to Define Files: 1 <ENTER>
- 3 Enter the name of the new file and answer <Y> for "New File?".
- 4 Enter the password or <ENTER> for no password.
- 5 At the field screen press <ESC> <ESC> putting nothing in it.
- 6 Then press <BREAK> and answer both default questions NO.
- 7 Then press x to exit to the root prompt.

Type the following keystrokes substituting 'your file' with the actual name of the file you want to copy and 'new file' with the actual name of the file you just created

Type the following commands substituting xx, yy and zz with the actual number found there

```
1 <ENTER>
s/Ø:0:1:/xx:yy:z2:/p <ENTER>
```

The result you get from this should be:

```
'new file':xx:yy:zz:....(etc.)
```

Type:

2d <ENTER>

w <ENTER>

q <ENTER>

Change the owner (chown) on your screens, processing, and edits. Go back into Profile and edit your screens to clean up the password.

While reasonable efforts have been taken in the preparation of this information to assure its accuracy, Tandy Corporation assumes no liability resulting from errors or omissions in this information or from the use of the information contained herein.

SCRIPSIT 16 (26-6431) - KEY DECALS AND REFERENCE CARDS

There is a new National Parts number for ordering extra SCRIPSIT 16 key decals and reference cards. The part number is ART-5150, and it includes references for the DT-1 (26-6050), DT-100 (26-6052) and the console. The old part number, ART-5561, only had references for the console and the DT-1.

NOTE: References for the DT-100 have also been included with the 1.1 upgrade to SCRIPSIF 16 (700-3019).

(T. FARMER, 01-7879)

TANDY 1200 HD - WITH PCPAINT

When using PCPAINT with the Tandy 1200 HD to do a screen dump, make sure that LPDRVR SYS is NOT installed in your config.sys file. It may cause problems.

(R. BURROUGHS 01-7879)

<u>MS-DOS COMPUTERS - COLOR AT COMMAND LEVEL</u>

To install color at the command level of MS-DQS follow these procedures:

- Install ansi.sys into your config.sys file: Device=ansi.sys
- 2 Reboot your system, so that ansi.sys can be configured into your system.
- 3. At the command level, type: PROMPT \$e[3h]

(Upper and lower case are important here.)
This puts your MS-DOS computer into 80 x 25 color mode.

4 Type: PROMPT Seff:bm (f = foreground color, b = background color)

To see the results, type: dir

Foreground Color		Background Color
30	Black	40
31	Red	41
32	Green	42
33	Yellow	43
34	Blue	44
35	Magenta	45
36	Cyan	46
37	White	47

5 This will cause the user's prompt to disappear. To re-enable it, type:

PROMPT

6 To bring the system back to its normal mode, type: PROMPT \$e[Om or use the mode command: mode BW

(R. BURROUGHS 01-7879)
