## *PRODUCT NEWS*

The following information is provided by Technical Support,
Computer Customer Service, and Computer Merchandising.

### *DESKMATE (26-3259) - FOR THE COLOR COMPUTER*

The best sales aid for selling Color Computers is now in stock at your regional
warehouse.  DeskMate is the perfect tool for demonstrating the power of the CoCo to
your customer.  The icon-driven menus using a joystick, mouse or the keyboard can
demonstrate the CoCo's graphics, word processing, spreadsheet, telecommunications,
and filing capabilities.  It's a tremendous value at only $99.95!  And a perfect
companion sale for every CoCo disk drive you deliver.

DeskMate for the Color Computer is detailed in the catalogs (#393, p. 170; RSC-15,
p. 43).

NOTE: DeskMate is on a runtime diskette of OS-9 version 2.0.  The customer does NOT
need to purchase OS-9 in order to run DeskMate.  However, if the user wants to use
some of the features of OS-9 not directly supported by DeskMate, he/she will need to
purchase OS-9 (26-3030, $69.95) AND the 2.0 Upgrade for OS-9 (700-2331, $24.95).

Remember, DeskMate requires 64K and at least one disk drive (two drives are better
as there is only about 7K of data space on the DeskMate diskette).  With the
Christmas promotional price on 64K Color Computers and FD-500 Disk Kits, your
customer can purchase the entire package, including DeskMate, for only $459.85.

---

## _XENIX 3.1 UPGRADE_

700-3030 and 700-3031 now contain Xenix 03.01.00.  This new version of Xenix has several enhancements over Xenix 3.0.  Here are just a few:

1. 30% speed improvement on disk I/O
2. Online HELP utility
3. Hayes modem support
4. New improved manual
5. Disk Cartridge System support

In addition to enhancements all outstanding bugs in 3.0 were fixed including:

1. Form Feed problem
2. DC-2212 modem problem
3. Manual

**UPGRADE PROCEDURE**

New Tandy 6000 Customer
When a customer purchases a new Tandy 6000, you should furnish a 700-3030 at no additional charge.  Now available in TEW.

Xenix 3.0 to 3.1 Upgrade
If the customer is currently running Xenix 3.0 on a Model 16 or a Tandy 6000 you should sell him/her a 700-3035 for $99.95.  We are now charging for Xenix upgrades and we will continue to charge for them in the future.  Available November 6 in TEW.

Xenix 1.3.5 to 3.1 Upgrade
If a customer is currently running Xenix 1.3.5 on a Model 16, he will need to purchase a 700-3031.  The 700-3031 requires a hardware modification that must be done at a repair center.  A letter is being sent to all registered 1.3.5 owners offering them until January 31st to upgrade to Xenix 3.1 at $99.95 (regular suggested retail price $199.00).  All stores will receive special unit cost on 700-3031 until February 1st.  Effective February 1st Radio Shack will only support Xenix 03.01.00.  Now available in TEW.

Xenix 3.1 is a mandatory upgrade and you should encourage your customers to upgrade as soon as possible.  Take the time to explain the advantages of the new 3.1 operating system.  Don't forget to tell your customer about the new Tandy Disk Cartridge System (26-1245) and the advantages of a removable disk cartridge.

For those customers who have purchased the Xenix V7 development system (26-6401) there will be a V7 to 3.0 development upgrade (700-3034) available for $249.00. Both the Xenix 3.0 Development System (26-6402) and the Upgrade (700-3034) will be in the warehouse the first week in November.

NOTE: Xenix 3.1 Upgrade requires the customer to save his entire system (all hard disks) onto floppy using the conversion diskette supplied in 700-3031 and 700-3035. After backing up, the customer is required to reformat all hard disks using the 3.1 Boot Disk.  While the upgrade procedure is "user-friendly" it is very crucial and somewhat time-consuming.  Don't forget to recommend our ATSO program to your customers for assistance in converting to Xenix 3.1.

---

## MS-DOS/BASIC (25-1000 & 700-2604) - DOS DIFFERENCES IN 02.11.21 AND 02.11.22

We previously reported that the DOS portion of 02.11.21 and 02.11.22 were identical.
Turns out that's not quite true.  The differences are:

* BASIC.EXE is now fully implemented.  Also several changes have been made to make
  it more compatible with IBM BASICA.  All changes requested by the Educational
  sales people are included.

* BASICA.COM is a new file which executes BASIC from the keyboard.  When the
  command BASICA is used instead of BASIC, BASIC.EXE is loaded at a different
  location in memory.  With some applications this provides more compatibility.

* SYS.COM previously would not copy the MS-DOS operating system to some diskettes
  which had been formatted with IBM PCDOS.  These problems are now corrected.

* The DISKCOPY.COM program was completely rewritten.  It now is fully compatible
  with the IBM DISKCOPY.  The major change in operation is that it now formats the
  target diskette while copying if the target diskette is not already formatted
  with the same number of sides and sectors per track as the source diskette.

* The MODE.EXE program was enhanced to include the MODE COLORMAP and MODE TV
  command.  See the documentation replacement pages or README.DOC for a description
  of what these commands do.

* The GRAPHICS.COM program was significantly modified to allow printing of graphics
  to DMP or IBM compatible printers.  The updated documentation describes the new
  capabilities of GRAPHICS.

* ANSI.SYS was changed to correct the problem of not being able to substitute a
  control character with another character.  For example, substitute a "P" for a
  "control p" would not work correctly in the 02.11.21 version.

* LPINST was changed to remove the REM statement from the MODE command line and
  place it on the next line of the AUTOEXEC.BAT file.

* A README.DOC file was added to the diskette.

* IO.SYS (hidden system file) was changed to update the version number of MS-DOS
  from 02.11.21 to 02.11.22.

Replacement pages for the MS-DOS Reference Manual have been written documenting
these changes.

# *THIRD PARTY PRODUCTS – EXPRESS ORDER*

## *APPLICATIONS SOURCEBOOK (26-1378) - VOLUME VII*

Volume VII of the Applications Sourcebook is now available from TEW.  The Sourcebook has over 2500 program listings for all Radio Shack computers.  At $7.95 no computer system large or small should be sold without this reference guide along with it.

## *ATTACHE ACCOUNTING PROGRAMS - PRICE CHANGE*

Attache has lowered the price of several of their MS-DOS accounting programs. Please note these new low prices:

| CAT NO | PRODUCT | OLD $ | NEW $ | CAT NO | PRODUCT | OLD $ | NEW $ |
|--------|---------|-------|-------|--------|---------|-------|-------|
| 90-0160 | Attache AR | 595.00 | 395.00 | 90-0164 | Attache INVC/SA | 395.00 | 395.00 |
| 90-0161 | Attache AP | 595.00 | 395.00 | 90-0165 | Attache Pack I | 1425.00 | 795.00 |
| 90-0162 | Attache GL | 595.00 | 395.00 | 90-0166 | Attache Pack II | 1095.00 | 695.00 |
| 90-0163 | Attache IC | 595.00 | 395.00 | 90-0411 | Attache Payroll | 595.00 | 595.00 |

## *MIRACLE (90-0293) - DC-2212 MODEM (26-1176) CONFIGURATION*

Micro-Systems Software's integrated telecommunications program, MIRACLE, can easily be configured to work with the DC-2212 Modem.  All that needs to be changed are the default dial prefix and suffix.  Once these have been altered, you can save a new terminal definitions (.TRM) file and use this as a default starting point for future terminal definitions files.  The actual procedure for the change is simple.  Type: F10 (D)efault (P)hone (D)ial (P)refix.  You should have the "Dial prefix:" prompt on the screen.  This tells MIRACLE what to send to the modem BEFORE sending the phone number.  Enter the following string:

        `*.C~*.GDT  <ENTER>

Type:  (S)uffix.  You should see the "Dial suffix:" prompt on the screen.  Enter the string:
        `X  <ENTER>

This completely configures MIRACLE to use the DC-2212 Modem.  If you wish, you can Archive this terminal definition (*.TRM) file and use it later as a starting point for each of your future services.  MIRACLE will also support the new Hayes compatible 300/1200 baud modems with no configuration changes!

The Express Order Software EXCLUSIVE price reduction to $99.00 (until January 1, 1986) makes MIRACLE the deal of the century for your modem users.  And with the simple tip listed above, DC-2212 owners can also enjoy full auto-dial support.

## *SAMNA CORPORATION - NEW CUSTOMER SUPPORT NUMBER*

Samna Corporation, the Vendor for Samna Word III (90-0296) has a new customer support line:    800 241-2065.  Please update all of your lists to show the correct phone number.

---

## CSR GRAPEVINE

---

As indicated by the name, "Grapevine", this section allows Customer Service Representatives to share information with each other. It is here you can communicate your latest findings and "bits of wisdom" to all CSR's. If you wish to contribute to the CSR Grapevine use the Submission Form attached to the last Update of each month.  Please be sure to include your Name and Store Number.

NOTE: We attempt to separate fact from fiction but not being omniscient we may occasionally goof. If so, let us know about it. We'll gladly correct ourselves.

WARNING: The information contained in the CSR Grapevine is made available on an "as is" basis for the use of store personnel only.  Much of the information will not be supported by Computer Customer Service and in no way shall Tandy Corporation be responsible for any problems caused by the use of this information.

All articles which do not include a by-line came from Computer Customer Service.

## MULTIPLAN - KEEPING A RUNNING TOTAL

There is no way in Multiplan to keep a running total as the form below shows:

Input Cell  -->  Running Total Cell

Example:

| Input Cell | Running Total |
|------------|---------------|
| $5.00 | $5.00 |

| Input Cell | Running Total |
|------------|---------------|
| $3.00 | $8.00 |

"Circular References Unresolved" is the error message you will keep receiving.

*(A. SHEARY, 01-7879)*

## MODEL 4 MULTIPLAN (26-1530) - WITH THE PTC-64 (26-1269)

When using Multiplan and the PTC-64 Printer Controller, the user does not regain control of the keyboard until it finishes printing.  Because Multiplan has numerous formatting procedures that it goes through for each cell, it actually sends its output to the printer at about the same speed that most of our printers print.  Thus it takes as long to send the data to the spooler as it does to print it, and the user will not regain control of the keyboard until it is finished.

*(R. MOORE, 01-7879)*

_____

## *GENERAL LEDGER (26-1540) - CHANGING INFORMATION IN RECORDS*

When setting up General Ledger accounts, it is possible to change information in both prior and current periods until transactions have been entered.  After transactions have been entered, history figures cannot be changed.

*(D. LONSFORD, 01-7879)*

## *MODEL 4 DISK SCRIPSIT (26-1563) - CONVERTING DOCUMENTS TO SUPERSCRIPSIT*

Use the following procedure to convert Model 4 Disk SCRIPSIT documents for use with SuperSCRIPSIT (26-1595):

1.  Save the Disk SCRIPSIT document with the ASCII option.
2.  If the document is on a program diskette, copy it to a data diskette.
3.  Convert the document to TRSDOS 6.2 formatted diskette using the conv command.  The Source Drive cannot be drive 0.
4.  Convert the document from ASCII to SCRIPSIT format with the SuperSCRIPSIT ASCII Conversion Utility.
5.  Edit the document as necessary to meet your desired format.

*(R. EDWARDS, 01-7879)*

## *MODEL 4 DESKMATE (26-1608) - PROGRAM CAPACITIES*

| | |
|---|---|
| Text | 32K |
| Worksheet - | 5K |
| Filer - | approximately 1,100 records |
| Calendar - | approximately 1,100 records |

These capacities are hard-coded and do not increase on a 128K machine.

*(T. FARMER, 01-7879)*

## *MODEL III NETWORK 3 PASCAL (26-2739) - PATCH TO GENERATE FORM FEED*

The following Patch allows Network Pascal to generate a form feed at the end of each listing.  You would apply the Patch using the patcher program supplied on Model III Pascal, disk one.

File = NETPCLFF/PAT      LRL = 256      REC = ASCII

```
O,NETPCL/CMD,NETPCL
P,5A2A,08FE,0004,44,20,45,20,54,20,45,20
P,5A2E,092E,0004,43,20,54,20,45,20,44,0C
P,5A6A,090A,0004,44,20,45,20,54,20,45,20
P,5A6E,093A,0004,43,20,54,20,45,20,44,0C
W,DB90
E
EOF
```

*(T SMITH, 01-7879)*

---

## _SCRIPSIT THINLINE/HD (26-4835) - WITH THE DAISY WHEEL II SHEET FEEDER (26-1448)_

When using SCRIPSIT with a Daisy Wheel II Sheet Feeder and 8 1/2 x 11 inch sheets of paper, set paper size to 66 lines, select "F" for Sheet Feeder at the PRINT MENU, and set the switch on the Sheet Feeder to 15.

*(R. R. LUDWIG, 01-7879)*

## _SCRIPSIT THINLINE/HD (26-4835) - BASIC PROGRAM TO CONVERT FILES_

The following BASIC program was successful at filtering out non-ASCII characters so that a file transmitted to TRSDOS-II could be converted into SCRIPSIT for Thinline and Hard Disk Use.  Once you get the "destination" file created, follow the instructions beginning on page 123 of the SCRIPSIT Reference Manual to do a TRSDOS-II to SCRIPSIT file copy.

```
10 CLS:ON ERROR GOTO 0
20 CLEAR 2000
30 LINEINPUT "Source Filename..........: ";S$
40 LINEINPUT "Destination Filename.....: ";D$
60 OPEN "I",1,S$
70 OPEN "O",2,D$
190 IF EOF(1) THEN 350
210 ON ERROR GOTO 350
222 LINE INPUT #1,X$:XXX=LEN(X$):IF XXX<2 THEN GOTO 400:ON ERROR GOTO 0
223 A$=""
224 FOR II=1 TO XXX:XX$=MID$(X$,II,1)
235 IF XX$=CHR$(13) OR XX$=CHR$(10) GOTO 290
240 K=ASC(XX$)
280 IF K<32 OR K>122 THEN NEXT II
285 A$=A$+XX$
287 NEXT II
290 PRINT #2, A$
300 GOTO 190
350 CLOSE
370 END
400 L$=STRING$(80," "):PRINT #2,L$
410 GOTO 222
```

*(T. FARMER & I. REDDY, 01-7879)*

## _THE PRECEDENT (26-4620) - DELETING POSTED TRANSACTIONS_

To delete posted transactions before billing, go into the Enter Time and Billing Transaction section and input all negative amounts for the transaction you want deleted.  In other words, reverse the process in Enter Time and Billing for that transaction.

*(V OTTERBINE, 01-7879)*

## PROFILE 16 (26-6412) - MATH OPERATIONS ON "DATE" FIELD

Profile 16 has a feature to do math calculation on a date field.

For example:
Field 6 is defined as mdy/, 8 characters long.
Today's date is: 10/24/85 and we want to calculate for the date, 14 days from today's date.

```
--------------------------------------------------------------------------------
Oct 24  13:53    1985     File Name:  Test                    Page 1
                          Processing: Automatic
1 ----------    -    -    -   -   -   -   -   -   -   -   -   -   -   -
         If:
         Then:   6 = @TD + "14"
```

The program will calculate the 'resulted' date as 11/07/85.

(P NGUYEN, 01-7879)

## PROFILE 16 (26-6412) - AUTO-UNLOCK ON BOOTUP & SECONDARY HARD DISKS

When Profile 16 is installed on a system with only a primary hard disk, data files are put in /appl/profile.  When "auto-unlock on bootup" is installed from the utilities menu, it updates the /etc/rc file to automatically remove any lockfiles from the /appl/profile data directory when the machine is booted.  However, when a secondary hard disk is added to the system, and profile data is moved to the secondary, problems will occur.  When the system is booted, the /etc/rc file will attempt to remove lockfiles from the Profile data directory which is no longer there.  This may cause erratic results with the rest of the rc file.  To fix this, edit the /etc/rc file to remove the offending "rm -f /appl/profile/*/lockfile" command.  Then re-install the auto-unlock on bootup again.  This will work providing the /etc/default/pfpath has been set up to work in conjunction with the secondary hard disk.

(D. NAUGHT, STORE #43-0778)

## TANDY 1000 DESKMATE (25-1000, 01.01.00) - DON'T USE SPACES IN FILENAMES

Be careful not to use a space in your filename when creating or saving files.  Deskmate displays your filename on the main menu using only the characters up to the first space.  When this file is selected for deletion, it is displayed at the bottom of the screen as all characters up to the first space, and the extension.  Pressing <ENTER> to confirm deletion will only get a beep of "unacceptance" from Deskmate.  Even if you remember the full filename, you cannot enter the necessary space at this point.  You will have to get back to the DOS level and use the "DEL" command to remove this file.

(DAVID CARRIG, STORE #43-0736)

---

## TANDY 1000 (25-1000) - DIGI-MOUSE CONTROLLER/CALENDAR (25-1010)

The Digi-Mouse Controller/Calendar for the Tandy 1000 is an all or nothing affair.
Mouse.sys, clockget.exe, and clockset.exe must all be present for the clock to work.
The mouse must also be a device in config.sys.

With mouse as device in config.sys, Microsoft Word will always have the mouse cursor
arrow on screen, even if keyboard is used instead of the mouse controller.  If
device = mouse.sys is removed from config.sys, the arrow will go away, but the clock
will not function.

*(C  BARBER, 01-7879)*

## TANDY 1000 (25-1000) - WITH THE 10 MEG HARD DISK (25-1025)

In RSCC/PLUSCC Update 1985-35 and 01-Store Update 1985-09 it was indicated that
there is a discrepancy between the instructions included in the 10 Meg Hard Disk
manual and the Hard Disk Controller Board manual.  Further clarification is
necessary.

There are two editions of the Hard Disk Controller Board manual.  In the first, the
instructions were indeed incorrect, indicating that the cables should run down from
the Hard Disk.  This was soon corrected, however, and books now shipping with the
product show th cables running up as illustrated in the 25-1025 installation manual.
The easiest way to tell which book you have is to look for Figure 6 -- if it's on
page 10 you've got the wrong book.  You can get the correct one from National Parts
by ordering Part # MU 250-1007.

*(T. ROSENBERG, 44-0069)*

## FINANCE MANAGER (25-1148) - ADDENDUM ERROR

On page 2 of the addendum to this package, there is a reference to the file
"HDMOVE".  This file is NOT present on this disk.

In place of this command, type:       **copy a:*.* c:**

*(C  RINEY, 01-7879)*

## MAI ACCOUNTING PACKAGES - RUNNING MULTIPLE COMPANIES

You CANNOT run multiple companies with the MAI Accounting packages on the hard disk.
The packages must all reside in the /APPCTL directory and will not be recognized in
any other directory.

*(L. POYTHRESS, 01-7879)*

## TANDY 2000 DR GRAPH (26-5278) - USING BOTH B & W AND COLOR MONITORS

Page 1 of the User's Guide Supplement states that you can configure DR Graph with
both a B & W and Color Monitor.  If using both, you must designate the B & W Monitor
as the primary device or you will not be able to toggle the output between the
monitors.  The manual does not state which keys designate the toggle switch and how
they are used.  A software information request form has been submitted.

*(K. D. BURNS, 01-7879)*

## DBASE III (26-5353) - INSTALLATION ERROR CODES

When attempting to install dBase III on a Tandy 2000 HD, two common error codes one might get are:

| ERROR CODE | DESCRIPTION |
|---|---|
| 0104 | The hard disk you are attempting to install dBase III on does not have a minimum of between 2 and 2 1/2 meg of available disk space. |
| 0230 | I/O error reading hard disk.  Chances are bad sector on the hard disk. |

(P NGUYEN, 01-7879)

## CORNERSTONE (26-5354) - WITH DWP PRINTERS

Cornerstone comes set up for DMP printers.  These drivers will work with DWP printers and the underline function works properly.  Bold will only work on the DWP-510 (26-1270) and DWP-220 (26-1278) because currently these are the only DWP's that support bold facing through control codes.  The DMP 2100/2100p driver appea to give the best results with DWP printers.

(V SCEARSE, 01-7879)

## MS-DOS PROGRAMS - AVAILABILITY OF COLOR

When customers ask "Can I get color in...?":

| PROGRAM | MODEL | COLOR? |
|---|---|---|
| dBase III | 2000 | No |
| | 1200 | Yes |
| | 1000 | ** |
| Framework | 2000 | Yes |
| | 1200 | No |
| | 1000 | ** |
| Wordstar | 2000 | No |
| | 1200 | Yes |
| | 1000 | Yes |

** This program is not supported on this computer.

(J. PARRIS, 01-7879)

## *TANDY 3000 (25-4001) - SOFTWARE DIRECTORY CORRECTIONS*

The November 18, 1985 edition of the "3000 Software Directory" has been replaced with the November 19, 1985 edition. The November 18th edition was shipped with the first Tandy 3000 sent to the Computer Centers (11's) and Computer Departments (18's). The November 19th edition is attached to this Update. The following changes were made:

| | | |
|---|---|---|
| PAGE 2 | Plus Mouse/Calendar Board | correct catalog # 25-1015 not 25-2015 |
| PAGE 2 | Tandy Plus Adapter Card | correct catalog # 25-1016 not 25-2016 |
| PAGE 3 | GWBasic Compiler 26-5251 | NOT recommended for use with the 3000 |

Please make note of these corrections.

## 700-SERIES INFORMATION

The following is a list of current and future 700 numbers for Computer Software
corrections, addendums, revisions and enhancements for the Color Computers, Models
I/III/4/4P, Tandy 200/Model 100, Tandy 6000/Models II/12/16, Tandy 2000/1200HD/1000.
EDITOR S NOTE: These products are listed by 26-series number.

| CAT NO | PRODUCT | DESCRIPTION | 700 # | STATUS | SUGG RTL |
|--------|---------|-------------|-------|--------|----------|
| **PERIPHERALS** | | | | | |
| 26-1191 | Tandygraph | Model III Version | 700-2112 | In Stock | N/C |
| 26-1191 | Tandygraph | Model II Version | 700-2111 | In Stock | N/C |
| 26-1266 | CR-510 Card Reader | Model III Driver Program | 700-2115 | In Stock | N/C |
| 26-1266 | CR-510 Card Reader | Model II/12 Driver Program | 700-2116 | In Stock | N/C |
| **COLOR COMPUTER** | | | | | |
| | 8-Bit Printer Driver | Allows use of print options on LP VIII and LP VII | 700-2013 | In Stock | N/C |
| 26-1196 | Graphic X-Pad | Demo Program | 700-2114 | In Stock | N/C |
| 26-3030 | OS-9 Operating System | Upgrade to Version 02.00.00 | 700-2331 | 11/30/85 | 24.95 |
| 26-3030 | OS-9 Operating System | Upgrade to Version 01.01.00 | 700-2330 | In Stock | 14.95 |
| **TANDY 200/ MODEL 100** | | | | | |
| 26-1183 | Bar Code Reader | Disk Version | 700-2401 | In Stock | N/C |
| 26-3801 | Model 100 | I/O Documentation | 700-2245 | In Stock | N/C |
| 26-3806 | Disk/Video Interface | Tandy 200 Software | 700-2402 | In Stock | N/C |
| 26-3839 | Remote Disk | Model II/12/16 Version | 700-3402 | In Stock | 19.95 |
| 26-3839 | Remote Disk | Model 4 Version | 700-3401 | In Stock | 19.95 |
| 26-3839 | Remote Disk | Model I Version | 700-3404 | In Stock | 19.95 |
| 26-3839 | Remote Disk | Model III Version | 700-3406 | In Stock | 19.95 |
