SCRIPFIX

The SCRIPFIX program is distributed on a data diskette. If you have more than one drive, place a SCRIPSIT™ diskette in drive 0 and the SCRIPFIX diskette in another available drive.

End SCRIPSIT™ and type at:
TRSDOS Ready
....
COPY SCRIPFIX:d TO :0
and press <ENTER>

Note: d=drive # where SCRIPFIX is located
SCRIPFIX will be copied onto your SCRIPSIT™ diskette.

If you have only one drive, ask your friendly Radio Shack dealer to copy SCRIPFIX onto your SCRIPSIT™ diskette for you.

After the copy is complete, type at:
TRSDOS Ready
....
I
and press <ENTER>

If the SCRIPSIT™ disk to be repaired is not in drive 0, place it in an available drive now.

Then type at:
TRSDOS Ready
....
SCRIPFIX
and press <ENTER>

SCRIPFIX cont

You will be asked for the drive # of the disk to be repaired. Type the number.

SCRIPFIX will start processing your damaged diskette. This process will take several minutes. As each document heading is found, it will be displayed on the screen. When the entire file has been processed, you will be asked to press <ENTER>. The process is complete.

*** N O T E ***

The repaired diskette can NOT be used as a normal SCRIPSIT™ diskette. You may read any and all available documents. You may print them or you may copy them to another SCRIPSIT™ diskette. The results of trying to modify and resave a document or creating a new document are TOTALLY UNPREDICTABLE.

Files which have been deliberately killed will have their titles restored also. If they have been killed for a period of time and new files created, they may have been overwritten and won't be useable even though their titles are restored.

It is recommended that important documents be IMMEDIATELY copied to another SCRIPSIT™ diskette after using SCRIPFIX.

In some cases a document title may have been destroyed. In such a case, that document will not be recovered by SCRIPFIX.

Scripsit is a Trademark of Tandy Corp.
